DETAILED ACTION

1. This is the second office action for serial number 09/754,716, Mount for TV Monitor, filed on 01/04/01. This application contains 25 claims numbered 1-15 and 21-30. Claims 16-20 have been canceled. Claims 21-30 have been added.

Claim Rejections - 35 USC § 112

2 The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 26 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 26 recites the limitation "the frame" in line 2. This limitation lacks antecedent basis.

Claim Rejections - 35 USC § 102

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 9, 10, 11, 21-24, 26 and 27-29 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,400,993 to Hamilton. For purpose of this discussion, please refer to previous attached marked-up copy.

Art Unit: 3632

Hamilton discloses a mount 10 including a frame 14, 16, 18, an upper catch part 112 with a slot 112a therein that is located centrally to side portions 50, 52 of the frame, and a swivel part 108, 108a suspended from a support 108b wherein the swivel part is fitted into the slot and engages the catch part (note Figs. 1-3). Hamilton also discloses that the catch part includes a tubular member 116 and a mount includes a rotation member. The rotation member is the pin that fastens the upper catch part to frame part 48 for allowing rotation about vertical axis V (note Figs. 1 and 5). See also Hamilton, column 5, lines 21-30. In addition, Hamilton discloses the swivel part that includes a barrel-shaped 110, the barrel-shaped swivel part engaging the catch part and the barrel-shaped swivel part being moveable relative to the catch part to tilt the appliance; the swivel being restrained from horizontal movement relative to the catch part; the swivel part is also attached to the support assembly (not shown) and also attached to a frame; the catch part includes a retainer intersected by a slot, the retainer having an arcuate portion (ring) located adjacent the barrel-shaped member.

Allowable Subject Matter

5. Claims 2-8, 12-15, 25 and 30 are objected to, but would be allowable if rewritten to include all of the limitations of the base claim and any intervening claims.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3632

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
